| Incident Description | <p>The claimant states that unknown persons broke into the rear of the premises during the night of 16–17 April 2025 by cutting the padlock securing the rear roller shutter. Consumer electronics stock with an alleged value of INR 6,86,780 was removed. The claimant discovered the break-in on arriving to open the shop at 09:10 AM on 17 April and immediately called the police. The first police officer at the scene noted in the preliminary report that the physical evidence was inconsistent with an external forced entry: the shutter damage pattern appeared to have been inflicted from the inside outward rather than from outside. An anonymous tip received by Nehru Place Police Station the same morning stated that the incident appeared staged, as the rear service lane — which had seen rainfall two days prior — showed no fresh tyre marks or footprints near the rear shutter consistent with a break-in. The insured's premises CCTV system was found with its recording hard drive wiped clean. The claimant has offered no explanation for this. Market authority CCTV covering the front of the premises is being reviewed by police. In a preliminary written note submitted by the attending field adjuster on 18 April 2025, it was stated: 'Based on the physical inspection and the pattern of prior claims, there are credible indicators of fraud. The scene does not present consistently with the reported mechanism of entry. Recommend this matter be escalated before any liability is admitted or payment processed.'</p> |
