B. INCIDENT INFORMATION

Date of Incident	17 April 2025
Time (Claimant)	02:15 AM [see CRITICAL INCONSISTENCY below]
Location	Shop No. 14, Nehru Place Market, New Delhi 110019
Weather	Clear night; street CCTV in market confirmed operational by market authority
Description	The claimant reports that unknown persons broke into the rear of the premises between 02:00 AM and 03:00 AM on 17 April 2025 by cutting the padlock on the rear shutter. Stock valued at INR 6,86,780 was allegedly removed. However, the first responding officer noted that the scene appeared pre-arranged and the break-in pattern was inconsistent with a forced entry — the shutter damage appeared to be inflicted from the inside outward. A neighbour submitted an anonymous tip to police stating the incident looked staged, as the rear lane was unusually clear of vehicle tracks despite recent rain. The insured's own CCTV hard drive was found completely wiped with no explanation provided by the claimant.

■ **CRITICAL TIMELINE INCONSISTENCY:** Claimant reports incident at: 02:15 AM FIR registration timestamp: 01:53 AM (Nehru Place PS log) The FIR was filed 22 MINUTES BEFORE the reported incident time. This must be resolved before any payment or further processing.

■ **ADJUSTER PRE-NOTE** (email dated 18 Apr 2025): Based on preliminary review, there are strong indicators of potential fraud. The pattern of claims (3rd theft in 24 months), contradictory physical evidence, and the wiped CCTV recording raise serious concerns. Recommend immediate investigation flag before any payment is processed.
